

I strongly oppose further media consolidation. How can a person of intelligence believe that it serves the public to have the news filtered through the biases of just a few conglomerates. I've seen how the public can be manipulated into accepting opinion as truth, but at least currently we can select from a variety of sources. We need to preserve the free flow of information, so, Mr. Powell, I ask that you keep the current ownership rules. I am sure that your father would approve.
